DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-3 and 12-13, drawn to a protein according to SEQ ID No: 1 and a kit for screening a compound that promotes or inhibits the protein of SEQ ID No: 1.

Group II, claims 4-8, drawn to DNA according to SEQ ID No: 2.

Group III, claim 9, drawn to an antibody to the protein of SEQ ID No: 1.

Group IV, claims 10-11, drawn to a method of screening a compound.

Group V, claims 14-19, drawn to a compound that promotes or inhibits a GABA transporter activity and a pharmaceutical comprising this compound.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons.

The special technical feature which links these claims is the protein or a partial peptide of this protein of SEQ ID No: 1 which has a GABA transporter activity. However, as stated in Claim 3, this also could be a partial peptide of SEQ ID No: 1 which reads on a di-peptide such as that of crystalline, Trp-Gly,

Art Unit: 1653

which is commercially available from American Peptide Company and has been known since 1979. This di-peptide is subsequently found at position 150-151 of SEQ ID No: 1.

Therefore, the technical feature linking the inventions of Groups I-V does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not differentiate the claimed subject matter as a whole over the prior art. Since according to PCT Rule 13.2 the presence of such a common or corresponding special technical feature is an absolute prerequisite for unity to be established, and given that there does not appear to be any other technical feature common to the claimed subject matter as a whole which might be able to fulfill this role, the currently claimed subject matter lacks unity of invention according to PCT Rule 13.1.

3. A telephone call was made to David Conlin on July 30, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Suzanne M. Mayer, Ph.D. whose telephone number is 571-272-2924. The examiner can normally be reached Monday to Friday from 8.30am to 5.00pm.

Art Unit: 1653
